

# HHB Sample Capstone Courses

Below is a list of sample seminar courses that recent HHB students have used to fulfill the senior capstone requirement. These seminars have been used by recent HHB concentrators, though not all are offered every year.

Students should consult [Courses@Brown](mailto:Courses@Brown) for the most up-to-date schedule.

This list is not exhaustive. Students may identify alternative seminars that align more closely with their academic interests and capstone goals. You are strongly encouraged to begin this planning early and to discuss potential seminars with your concentration advisor well in advance, to ensure cohesion with your course plan.

To be eligible for capstone credit, a seminar must meet the following criteria:

- Be senior- or graduate-level in content,
- Be capped at a size that facilitates in-depth discussion (typically 15–20 students),
- Include assignments that support critical and independent thinking within the concentration—such as final papers or integrative projects.

A student must obtain formal approval from the concentration advisor and document the capstone selection via [capstone declaration](#) and [capstone submission](#) process.

## Summer & Winter sessions

- BIOL 1455: Planetary Health: Global Environmental Change and Emerging Infectious Disease

## Fall courses

- ANTH 1300: Anthropology of Addictions and Recovery
- ANTH 1311: Language and Medicine in Practice
- APMA 1910: Race and Gender in the Scientific Community
